

OhanaLink™ - A suite of mobile solutions to connect patients and families.

OhanaLink is the easy-to-use smartphone app that offers 3 "mobile waiting rooms" to connect patients and their "ohana" or family throughout their healthcare journey. From pre-pregnancy through senior care, OhanaLink's unique communication and support platform offers a private community to connect and deliver messages, updates, reports, images and more—all at the same time—without the confusion of group emails and text messages.

OhanaLink Baby™ provides secure connectivity through a "mobile waiting room" designed to create a unique childbirth experience. Expectant parents can connect with their closest circle of family and friends before, during, and after labor and delivery. Plus, patients can share their pregnancy journey privately while creating a memorable experience to cherish forever.

About OhanaLink Technologies™

Ohana means family. Family means trust. Family and trust are at the core of OhanaLink Technologies™ and why we designed our suite of innovative solutions that connect families and patients when they need it most.

Developed as the brainchild of a woman entrepreneur from Western Pennsylvania whose vision was to create a social platform that offered privacy and control for patients, OhanaLink Technologies™ was launched in 2017, debuted beta products in 2019, and is now delivering a suite of solutions.

Today, our unique menu of products offers secure social communication channels for everyone and are designed to enhance the patient experience by providing a private, easy to use smartphone app that directly connects their "ohana," or community of loved ones.

Whether you're sharing a chapter in life's journey or are experiencing a longer-term medical or health-related episode, OhanaLink Technologies™ provides critical solutions for all stages of your life.
